1 INTRODUCTION

Dear Student

The following instructions relate to Assignment 4:

- The assignment questions are provided in TUT102
- The assignment must be uploaded in a pdf file that is NOT password protected.
- No handwritten assignments will be accepted.
- The memorandum for assignment 4 will be available after the final submission date as TUT201.

Assignment 04 is a written assignment that consists of short questions. Submit your answers to these assignment questions online via myUnisa. Use the APA 7 referencing style. Type the assignment in **Microsoft Word**, being sure to include your student details (number, name, surname), module code and the assignment number. Take mark allocation into consideration 1 mark per fact. Save your assignment as a **PDF file**, and then upload the **PDF file**. **Only PDF files will be marked!** Make sure that you upload the correct file, and that you have numbered your answers correctly according to the way the questions are numbered.

2 ASSIGNMENT 4 INF1520

2.1 Outcomes covered in the assignment 4

- All the five (5) learning units will be covered in this assignment.

2.2 Assignment information

Details of assignment can be found in the table below:

Assignment weight contribution towards final mark:	40% of formative assessments
Method of assessment	Written
Total marks:	100
The assignment is: (compulsory/mandatory/elective)	compulsory
The assignment will/not be proctored using IRIS	No
Turn-it-in will be used for projects/take home/written assignments	No

The date for submission can be found on myUNISA.

2.3 Assignment submission instructions

- Unisa, as a comprehensive open distance e-learning institution (CODeL), is moving towards becoming an online institution. You will therefore see that all your study material, assessments and engagements with your lecturer and fellow students will take place online. We use myUnisa as our virtual campus.
- The myUnisa virtual campus will offer students access to the myModules site, where learning material will be available online and where assessments should be completed. This is an online system that is used to administer, document, and deliver educational material to students and support engagement between academics and students.
- The myUnisa platform can be accessed via <https://my.unisa.ac.za>. Click on the myModules 2026 button to access the online sites for the modules that you are registered for.
- The university undertakes to communicate clearly and as frequently as is necessary to ensure that you obtain the greatest benefit from the use of the myModules learning management system. Please access the announcements on your myModules site regularly, as this is where your lecturer will post important information to be shared with you.
- When you access your myModules site for the module/s you are registered for, you will see a welcome message posted by your lecturer. Below the welcome message, you will see the assessment shells for the assessments that you need to complete. Some assessments may be multiple choice, some tests, others written assessments, some forum discussions, and so on. All assessments must be completed on the assessment shells available on the respective module platforms.
- To complete quiz assessments, please log on to the module site where you need to complete the assessment. Click on the relevant assessment shell (Assessment 1, Assessment 2, etc.). There will be a date on which the assessment will open for you. When the assessment is open, access the quiz online and complete it within the time available to you. Quiz assessment questions are not included in this tutorial letter (Tutorial Letter 101) and are only made available online. You must therefore access the quiz online and complete it where the quiz has been created.
- It is not advisable to use a cell phone to complete the quiz. Please use a desktop computer, tablet or laptop when completing the quiz. Students who use a cell phone find it difficult to navigate the **Online Assessment** tool on the small screen and often struggle to navigate between questions and successfully complete the quizzes. In addition, cell phones are more vulnerable to dropped internet connections than other devices. **If at all possible, please do not use a cell phone for this assessment type.**
- For written assessments, please note the due date by which the assessment must be submitted. Ensure that you follow the guidelines given by your lecturer to complete the assessment. Click on the submission button on the relevant assessment shell on myModules. You will then be able to upload your written assessment to the myModules

site of the modules that you are registered for. Before you finalise the upload, double check that you have selected the correct file for upload. Remember, no marks can be allocated for incorrectly submitted assessments.

2.4 Assignment questions

Question 1 [8]

The development of computing devices and Human-Computer Interaction can be categorised into four eras, indicate what each of these eras are called and what are the main characteristics of these eras.

Question 2 [10]

Define the following terms:

- 2.1 Mobile computing
- 2.2 Multimedia interfaces
- 2.3 Usability
- 2.4 HCI as defined by Johnson 1997
- 2.5 User Interface (UI) Design

(2 marks per definition)

Question 3 [9]

According to Shneiderman et al. (2014), it is not enough to focus only on mobile and ubiquitous computing; it is also important to consider hardware and software diversity. What are the technical challenges identified and why?

Question 4 [10]

Identify factors that affect perception.

Question 5 [10]

List and discuss the guidelines designers use to get users' attention, with the precaution that it should be used moderately to avoid clutter.

Question 6 [10]

List and describe FIVE (5) different kinds of slips.

Question 7 [10]

Provide some advantages of using multimedia interfaces.

(any 5 valid advantages)

Question 8 [10]

8.1 Define usability testing. (2)

8.2 What typically happens during usability testing? (3)

8.3 What is the purpose of prototypes and what functions do they fulfil? (5)

Question 9 [9]

9.1 Shneiderman provided principles for user-centred design. Explain which aspects need to be taken into consideration with respect to recognising diversity. Also, provide the aspects that need to be considered.

Question 10 [14]

10.1 Discuss what is meant by the term constraint and provide an example. (2)

10.2 Name at least three types of constraints and provide an explanation and example of each. (Page 52) (12)

(any 3 types: 1 mark per type of constraint = 3+ explanation = 6+ example = 3)

Opening Screen

<http://gpsdtechhelp.pbworks.com/f/StorybookWeaverDeluxeUserGuide.pdf>

10.3 The above-mentioned figure shows some icons from a children's game. Explain whether the screen fails in terms of visibility? (Page 53) (6)

3 ACADEMIC DISHONESTY

3.1 Plagiarism

Plagiarism is the act of taking the words, ideas and thoughts of others and presenting them as your own. It is a form of theft. Plagiarism includes the following forms of academic dishonesty:

- Copying and pasting from any source without acknowledging the source.
- Not including references or deliberately inserting incorrect bibliographic information.
- Paraphrasing without acknowledging the original source of the information.

3.2 Cheating

Cheating includes, but is not limited to, the following:

- Completing assessments on behalf of another student, copying the work of another student during an assessment, or allowing another student to copy your work.
- Using social media (e.g. WhatsApp, Telegram) or other platforms to disseminate assessment information.
- Submitting corrupt or irrelevant files, this forms part of examination guidelines
- Buying completed answers from so-called “tutors” or internet sites (contract cheating).

3.3 For more information about plagiarism, follow the link below:
